MANILA HOTEL Co.

BENTLEY'S MILLION CYPHERS

*for the transmission of Numbered Sentences from
Public or Private Codes in one word are to be found
at the end of this Volume with full directions,
shewing that they can be indiscriminately mixed
with Cyphers from this Phrase Code.*

*This Code includes the Telegraph
Cyphers entered according to Act
of Congress in the year 1906, by
E. L. BENTLEY, in the office
of the Librarian of Congress at
Washington, D.C.*

BENTLEY'S COMPLETE PHRASE CODE,

(NEARLY 1000 MILLION COMBINATIONS)

With at least 2 Letters difference between each Half-Code Word)

COMPILED BY

E. L. BENTLEY.

MANILA HOTEL CO

Telegrams can be expressed verbatim with a minimum saving of 50 %

Any two Code Words herein (having 5 letters in each) can be joined together, either before or after one another, and be telegraphed as ONE WORD of 10 letters: The user therefore compiles his own Phrases verbatim, if those in the Code are not applicable, with a minimum saving of 50 per cent. (*See Specimen Messages herein*).

PRINTED AND PUBLISHED BY
ROSE PUBLISHING COMPANY

NEW YORK
NEW ADDRESS:
TECHNICAL BOOK COMPANY
525 MARKET ST. - UNDERWOOD BUILDING

Gift of M.G. Luck

Upon receipt of a telegram divide the 10 letter Code Words in half and translate each portion.

HE 767
B4
19

The single (5 letter) Code Words can be used alone, and are designed to have a difference of at least two letters between each. Great care has been exercised to eliminate all words telegraphically convertible.

If this Code is used for telegrams of an exceptional character in place of other Codes in regular use and there is any risk of mistranslation the message should be prefaced with the half cypher "COLOC," meaning "Bentley's Complete Phrase Code." This, however, could be avoided by having a Special Address Indicator reserved for this Code. As most Codes have dictionary words as cyphers, it will generally be found that this Code (containing artificial Code Words) can be indiscriminately mixed with other Codes, and thus prove an invaluable auxiliary.

Many merchants use Whitelaw's Telegraph Cyphers for their Figure Codes, and for this reason the cyphers in "Bentley's Complete Phrase Code" have been designed to give a two-letter difference, as compared with Whitelaw's collection of 500 million artificial cyphers, thus giving this work a special value, as it supplies a complete General Code without interfering with the figure Code messages.

The Author (with an experienced staff) undertakes the gratuitous examination of Coding Systems, with a view to their improvement and adaptation to the additional facilities granted at the International Convention of 1903.

PREFACE

TO

REPRINT OF FIRST EDITION.

The rapid absorption of the first issue of 2,000 copies by eminent firms throughout the world has occasioned an early and larger reprint of this Code (without alteration) from the original type. The Preface, therefore, to that issue follows this Preface, as it equally applies. It is gratifying to the Proprietor that the Code has proved itself so invaluable and complete that it has not been necessary to bring out any second Edition, although in future years a few words or phrases could advantageously be added. Holders object to new Editions on account of the confusion which arises and the expense entailed. With these objections the writer of this Code entirely concurs.

MILLION CYPHERS.—Shortly after the Code was published some firms desired to incorporate sentences from their own or other Codes where these were represented by numbers. To meet this demand One Million Cyphers, numbered (to make any combination) from 0 to 999999 were compiled, the code words being composed of two sections of four letters each. These two sections when united convey the above numbers in eight letters, and thus form an immediate distinction from the five or ten letter cyphers used in this book. This small addition was issued to all holders of the Code and bound up at the end of all copies subsequently issued. This facility has been largely availed of. (See page V.)

MINING EDITION.—As many of the leading Mining Companies wished to avail of the unlimited scope of this Code, the Author prepared a "Mining Edition," utilizing the Supplement for a wide range of Mining Expressions compiled by experts. The sale has been most gratifying.

FIGURE CODES.—As the cyphers in this book have a difference of at least two letters between each half word and have been found so reliable in transmission, Merchants and others have found the necessity of having the same words applied to figures, so that a half (five letters) word could divert the translator of a message to a Figure Code system after using words from the Phrase Code. The proprietor has, therefore, published—

900 Million Edition numbered from 00000 to 29999 in each <u>half</u> word, making a maximum combination of	2999929999
400 Million Edition, using the <u>consonant</u> cyphers only, numbered from 00000 to 19999, making a maximum combination of	1999919999
100 Million Edition, using the <u>vowel</u> cyphers only, numbered from 0000 to 9999, making a maximum combination of	99999999

DISTINGUISHABLE CYPHERS.—Other clients desired to use the above 400 Million Edition prefixed by a distinguishable cypher, the cypher itself conveying information. With this object the compiler has issued "600 Distinguishable Prefixes," all commencing with two vowels and ending in an "i" or "u," numbered respectively from 000 to 599. These cyphers are distinguishable by reason of their commencing with two vowels and ending in "i" or "u," whereas the cyphers in the

Phrase Code neither begin nor end with those features. They point at once to a Figure Code system being used, and as the terminals "i" or "u" precede a consonant they make excellent words and give a maximum combination of 59919999. These words can be indiscriminately mixed with phrases from the Phrase Code and enable a Merchant to express any of 5 sentences, any of 99 quantities, any of 199 articles, and any of 99 prices in one word.

Other firms who frequently use Figure Codes employ the maximum combinations of the 900 Million Cyphers, addressing the telegram under a Special Address Indicator, thus showing that the message is being read from the Figure Codes and not from the Complete Phrase Code.

HINTS TO USERS.—The following hints having been widely appreciated, it has been decided to embody them in this Preface with the object of obtaining the best results by avoiding needless expenditure :—

JOINING MESSAGES IN MIDDLE OF WORD.—If a Telegram contains two messages on different subjects, one of these can end in the first half of a cypher, and the second message can commence with the last half of the same word. It would not be necessary to send a separate half-cypher to terminate the first subject, but the code words are, nevertheless, designed so that, if needful, they can be used as five-letter words by themselves in a single-word message.

Example of commencing a different subject in centre of Code word—

Referring to your telegram of yesterday we do not		
approve	ugfik	}ugfikugtuc
Referring to your telegram of 23rd	ugtuc	
Await instructions before taking further action	adtur	}adturugewb
Referring to your telegram of to-day we approve	ugewb	

It will be observed that three subjects (including dates) are conveyed in two words.

NUMERALS.—Under "Numerals" will be found an excellent Table rising from 1/64th to 5,000,000, each number or fraction being represented by a half-cypher. Any figures rising by units up to 1,000 can be expressed by a half cypher; subsequent amounts will be found to rise by easy gradations.

Examples—

208,791, viz.: 208	liuty	}liutymafan
791	mafan	
28,861, viz.: 28,000	mocab	}mocablosiz
861	losiz	

such items as $3\frac{2}{3}$ ths or $100\frac{1}{4}$ th can be given thus:—

$3\frac{2}{3}$ ths	lecva	}lecvalanup
$\frac{2}{3}$ ths	lanup	

STERLING AMOUNTS.—The Sterling Table is probably more complete than in any other Code and rises from 1/32nd of a penny to £10,000,000. This enables such amounts to be expressed as—

£104 : 11/4 $\frac{1}{2}$, viz.: £104	tiatl	}tiatlspagd
11/4 $\frac{1}{2}$ d.	spagd	

The Numerals and Sterling Tables can be usefully united thus:—

From Numerals, 871 =	marof	}marofsowyj
„ Sterling, 10/1d.	sowyj	

showing that the 871 expresses the pounds because it is coupled to 10s. 1d. The object of uniting the two sections is because the Numerals Table rises by easier gradations than the Sterling Table.

FOREIGN CURRENCIES.—The Currencies of all countries can be stated by coupling a Numeral on to the word representing the currency thus:—

371 roubles	{	371	...	...	...	...	...	lotya	}	lotyapolec
		roubles	...	...	...	...	...	polec		
791 roubles and 25 kopecks	{	791	...	...	...	...	...	mafan	}	mafanpolf
		roubles and 25 kopecks	...	...	...	...	...	polf		
\$10,500 71 cents.	{	10,500	...	...	...	...	...	mitan	}	mitanbyetz
		71 cents	...	...	...	...	...	byetz		

Measurements can be given thus:—

850	51	19½	4	} viz. :—	lopwolewer
lopwo	lower	lepmo	leezt		lepmoleezy

and yet be expressed in two words because each of the groups of figures is represented by half a cypher.

AUXILIARY VERBS AND PRONOUNS.—To simplify the arrangement of the phrases composed of auxiliary verbs and pronouns (which really have no subject word in them) they are placed under the first word of such sentences. For example:—Under “If” will be found “If you have,” “If you will,” &c. Under “We” will be found “We have,” “We will not,” &c. Under “Have” will be found “Have not,” “Have not had,” &c. All the pronouns and auxiliary verbs are fully treated.

SECTIONAL PHRASES.—Sectional phrases are inserted to facilitate precision in expressing verbatim messages. For example:—“Been any,” “Better not be,” “That are,” so as to make up phrases such as—

There has (have) not ...	...	...	...	...	...	...	uktaj	}	uktajayeng
been any	...	...	...	...	...	...	ayeng		
Those	...	...	...	...	...	...	ulzra	}	ulzraukkoc
that are	...	...	...	...	...	...	ukkoc		

OFFERS AND PRICES.—Under the word “Offer” will be found an extensive range of sentences, each expressed by a half cypher, so that they can be coupled on to any article inserted in the Supplement (referred to later), or such sentences can be coupled on to prices or any other phrase.

Example—

We offer firm c.i.f. shipment by steamer within 1 month ...	natgy	}	natgyslasp
2/5½d. ...	slasp		

Quotations also are a special feature and can be coupled on to prices, list of goods, &c.

USE OF SINGLE WORDS.—The following message illustrates the importance of Single Words in the Vocabulary, which render the “Phrase Code” quite unique.

Examples—

Agreement	hopeless,	conditions	imposed
ahosb	hozas	daodz	idhel
prohibitive,	compromise	impossible,	negotiations
oktig	dabzy	idijn	kueft
		suspended	meantime
		udewl	kaicy

Expressed by ten half cyphers = five words. It is only necessary to draft the message in the briefest phraseology, and thus ensure a minimum reduction of 50 per cent.

It will be noted that, unlike some Phrase Codes (useless imitations), each word has a separate half-cypher, thus avoiding any ambiguity

EXTENSIVE SUPPLEMENT.—The Supplement to the Code is one of its most valuable features. Upwards of 2,000 Blanks are left at the end of the Code, each represented by a half-cypher, in order that users may insert phrases peculiar to their own business: Names of Firms, Companies, Ports and Places, Lists of Goods, &c. Any two of such Supplementary Sentences can be joined together as one word, or, similarly, any one of them can be joined on to any other of the many phrases or words in the Code. Sentences could be inserted, many of which require one or more blanks to be filled up with Figures, Dates, &c. (thereby saving 50 per cent.), and these can be coupled on to the Figures or Sterling amounts, &c., in the Code in one word, or a series of quotations can follow, each expressed by a half-word, and, therefore, any two can be joined together.

PRINTED SUPPLEMENTS.—Special Supplements of 2,000 Phrases have been printed for large Private Firms and Companies, usually costing about £12, rendering the Code equivalent to a Private Code, without incurring the heavy outlay of printing an exclusive Code.

AUGMENTING THE SUPPLEMENT.—Firms who find the Supplement of 2,000 Blanks inadequate, for example, a Firm not engaged in the Shipping trade, could appropriate for Supplementary sentences, between 200 and 300 cyphers used under the words “Coal” and “Charter,” merely deleting the sentences in the body of the Code and inserting the words “See Supplement.”

Other firms have utilised “BENTLEY’S 300 ENGLISH CYPHERS” of five letters, all of which differ from each other and from those in the “Phrase Code” by at least two letters. These can usefully augment their Supplement by, for example, appropriating such English cypher words as “Abode” (which are identifiable) to names of firms, ports, or lists of goods, &c., &c.

FIGURE CODES.—Examples taken from a suggested Merchant’s Supplement:—

“We offer firm for reply here not later than (—) (date) for (—) tons of (—) (goods) at (—) (price).” Each blank could be filled up by a half-cypher, but regular stereotyped messages, giving ranges of sentences, periods for reply, quantities, goods, prices, &c., should, of course, be arranged on the Figure Code system, transmitted by “BENTLEY’S TELEGRAPH CYPHERS” in one word expressing 10 figures.

Example—

29	99	9	299	99
Sentences	Prices	Shipments	Articles	Quantities

INTERMIXING FIGURE CODES AND PHRASES WITHOUT INDICATORS.—Further uses of the Supplement can be made as follows:—

999 of the Blank Sentences with half-cyphers in the Supplement could be reserved for the Figure Codes, namely—they could be numbered from 000 to 999. These could then form the Prefixes (first three figures) of a Figure Code; the remaining half-word being read from one of “Bentley’s Telegraph Cypher” books, either from the 900 Million, 400 Million, or 100 Million Editions. The range of figures (identifiable by the Special Prefix which is taken from the Supplement to the “Phrase Code”) could then be as high as—

99929999 or 99919999 or 99999999.

It will be noted in the first Example that one of the Sections could be 29 or 299 sentences, articles, &c. The figures can be divided as desired to meet individual requirements.

UNITING PHRASES WITH EXACT FIGURES.—It is also extremely useful to appropriate some of the words in the Supplement to those sentences which are constantly being used, and which necessarily have to be followed by high figures, for example, one of such sentences can be—"Draft for £(—), read next half-cypher from the Cypher Book." This, followed by the cypher meaning, say "21684," would show that you are expressing—"Draft for £21,684" in one word.

SECRET CYPHER.—Banks and other Clients avail of Bentley's Copyright Secret Cypher Card. These Cards applied to the Code render all messages absolutely secret except to the holder of the Key Card. It would be impossible for any person to read a message without the Key, as every word is on a different basis and yet the system is so simple that any inexperienced person could use it. The black figures are applied to the Code Words, and instead of the number of the Cypher standing on the Card against the Cypher, it tells you to send another Cypher (according to the number stated) in the same column. The recipient places the red side ("Translating Card") against the Cypher received and he is at once referred to the Cypher conveying the correct translation.

Exclusive Cards can be compiled (different from any other in existence) for the use of particular Firms, the range of such Cards being unlimited. Some of the largest Firms in the world are using these daily with unfailing accuracy and satisfaction. This prevents operators from reading and, as has been proved, disclosing the information contained in a confidential message.

MIXING A.B.C. AND OTHER CODES.—Many Firms are using their own private Codes on the whole word system, or such public Codes as the A.B.C., the Western Union and Lieber's Codes, which occasionally contain long and useful sentences. Any one of these can be indiscriminately mixed with the "Phrase Code," as at the end of that book will be found one million Cyphers which transmit any figures not exceeding one million in one word. You, therefore, merely transmit by the Million Cyphers the number of the sentence taken from one of these Codes (whichever the holder uses) instead of the code word which is printed against the sentence. It will be seen, before you translate it, that the code word expressing the number of the sentence contains only eight letters, which immediately distinguishes it from the words in the "Phrase Code," which must necessarily be either of five or ten letters. This is working satisfactorily in every country in the world, and thus further augments the facilities.

USED AS AN AUXILIARY CODE.—The adoption of "Bentley's Complete Phrase Code" does not necessarily disturb existing Private Codes in use. Two Codes can be mixed by merely inserting in both Codes (against half-cyphers) such sentences as:—

Read 1 $\frac{1}{2}$ -cypher from BENTLEY'S Code and thereafter revert to our own Code.

" 2 $\frac{1}{2}$ -cyphers " " " " " " "

" 8 $\frac{1}{2}$ " " " " " " "

" 4 $\frac{1}{2}$ " " " " " " "

Until otherwise instructed by a Code Word read from "Bentley's Code."

and the reverse for referring from the "Phrase Code" to a Firm's own Code.

Many Firms, on account of its completeness, always use Bentley's Code as the basis, and refer to their own Code when necessary by half a word. Others find Bentley's Code so explicit in expressing complex messages that they adopt a special Address Indicator for its use, thus avoiding any Index Cypher. The author will always advise gratuitously on this or other questions, as he finds, in many instances, that the Cyphers in both Codes do not conflict. Large Banking and Financial Firms are working on this principle.

REFERRING TO LINES AND SUBJECTS IN LETTERS.—By numbering Letters and also the Lines of the letters or Subjects therein, replies are facilitated, thus:—

Letter No. 203.

- 1.—We shall be glad to know by wire whether you have collected the sum outstanding from Mr. CRICK. Numbers are given at the end of this letter for your reply.
- 2.—Also please state whether you have shipped the goods ordered in our indent of 31st October (see below).

Yours faithfully.

- 3.—Amount has been collected from Mr. CRICK.
- 4.—Amount has not been collected from Mr. CRICK.
- 5.—Goods ordered in indent of 31st October have been shipped.
- 6.—Goods ordered in indent of 31st October have not been shipped.

Message reads—

Referring to your letter No.	...	...	...	...	jelpa	} jelpaliuty
203	...	...	...	...	liuty	
3 = amount has been collected from Mr. Crick	...	...	...	...	lecva	} lecvaluhug
6 = goods ordered in indent of 31st October have not been shipped	...	...	...	...	lehug	

This gives the number of the Letter and two complete pre-arranged replies in two words, as by turning up Letter No. 203 and reading "3" and "6" you get the replies. This obviates using a large number of temporary code words, which might, by accident, be simultaneously utilized, thus causing confusion.

BANKS AND INSURANCE COMPANIES.—Banks and Insurance Companies insert in the Supplement; Phrases or Tables suited to their own business. For example, an Insurance Company requires to state, in half a word, the value of Buildings, &c., thus:—

VALUE £

1,000	2,000	3,000	4,000	5,000	Side Column.
$\frac{1}{2}$ Code Words go in these Columns.					

plain thousands
250
500
750
&c.

Consequently "Value £2,750" can be expressed in half a word, the preceding or succeeding half-cypher (joined on to it) being another phrase alluding to the value.

Bankers insert Sentences *re* status of Clients, which can be coupled on to a Name in the Code Supplement in half a word. Similarly, Sentences *re* Telegraphic Transfers, &c., can be coupled to amounts; prices can be given of Stocks or Shares: amounts of Drafts, Remittances, Balances, &c., can be similarly stated.

SCOTT'S CODE (10th Edition).—The Author has compiled the large new Edition of Scott's Code, the first part of which embraces 153,000 sentences on General subjects, conveyed by whole-word cyphers selected from the Berne Official Vocabulary. This book proves an invaluable auxiliary to the Phrase Code, and can be purchased separately for £2 2/-. It effects a further material economy, as it is rich in long general sentences (embracing shipping and market advices), which can occasionally be advantageously availed of.

SPECIAL PRIVATE CODES.—Since the publication of this Code many orders have been received from clients for Special Codes for private use based upon the Complete Phrase Code. For this purpose the proprietor retains a trained staff of expert compilers. Private Codes are compiled and the requisite Cyphers supplied. In some cases where the required number of sentences exceeds the available half Cyphers it has been found practicable to have two columns of Code Words, one containing whole-word Cyphers for sentences seldom used, the other containing half Cyphers against quantities, prices, numbers and phrases constantly required to be coupled on to other phrases, including also a complete Vocabulary for coupling words together or uniting them to dates, &c.—(Example, "Shipped 23rd December"). The whole-word Cyphers in such cases are seven or eight letters, and are thus, at least, two letters shorter than the combinations of ten letters (two Cyphers of five letters each) and at least two letters longer than the five-letter half Cypher if used singly. Alternatively the whole-word Cyphers can all commence with "Q," for example "Quad," etc., making such identifiable Code Words as "Quadulzra" (9 letters). It will be noted that "Q" is entirely omitted from the Phrase Code Cyphers thus affording a sharp distinction.

The Proprietor desires to avail of this occasion to express his cordial acknowledgment of the many expressions of appreciation with which clients have favoured him. Large numbers have not only quadrupled their original orders but have warmly advocated the adoption of the Code by their correspondents. He warmly thanks them for their valued co-operation, which has so largely contributed to its world-wide circulation.

E. L. BENTLEY,

7, EAST INDIA AVENUE, LONDON, E.C.

13th December, 1909.

PREFACE.

THIS "COMPLETE PHRASE CODE," containing nearly 1,000 million combinations is compiled upon an extremely simple system to meet the universal demand for a Telegraph Code capable of transmitting economically almost any commercial or general telegram in the precise phraseology of the draft message.

In every business telegrams have to be despatched, dealing with a great variety of subjects (sometimes outside the ordinary scope of the business), which no public Code can adequately transmit with accuracy and economy. Unsuccessful efforts have hitherto been made to meet the requirements, but in most instances the code words have been compiled with only a one-letter difference between each, which entails great risk of misinterpretation. Other books have adopted two and three-letter cyphers which, when united, make a phrase. This, however, renders it almost impossible to discover the correct meaning of the mutilated word, because the code words are not "ready made," as in this book, but are "built up" to meet the requirements of the message. There cannot, therefore, be a code of the complete cypher words with which to compare the mutilated cypher, neither can the possible telegraphic transpositions be avoided.

In this work every care has been exercised to eliminate telegraphic similarities and to give at least a two-letter difference between each of the half-cyphers.

Should any portion of "Bentley's Telegraph Cyphers" be mutilated the error can generally (though, of course, not invariably) be rectified by reference to the "Terminational Order" of "Bentley's Telegraph Cyphers," found at the end of the Code. For example, the message "flurj" ("in exchange for") "azoft" ("bill of lading for goods per") might be mutilated in transmission in two places, thus, "blurjezoft." To detect this you would divide the word into "blurj" and "ezoft," and by turning up the Terminational Order the first part of the cypher will be found in alphabetical order backwards, commencing with "j"; you then find that "blurj" is not in the Code, but there is a cypher "flurj" which will give the correct reading. Treating the second half (also mutilated) and working backwards in the terminational order from "t" you find there is a cypher "azoft," but not "ezoft." It will thus be observed that in a code word of ten letters you can find a mutilation in four different ways, namely, from the first to the fifth letters, from the fifth back to the first, from the sixth letter to the tenth and from the tenth back to the sixth. These terminational orders have been found invaluable, and frequently avoid the delay of repeating messages. To further assist the discovery of telegraphic mutilations a list of possible substitutions is given at the beginning of the Terminational Order. This Code must, therefore, not be confused with other systems which give only a one-letter difference between the code cyphers, with all the consequent dangers.

The vocabulary will be found very complete as regards commercial and general telegrams, and the examples show its extraordinary scope in telegraphing verbatim messages.

Thousands of the most useful phrases in daily use (whether of a prefix or suffix character) will be found classified under the subject word of the sentence, any two of which can be joined together. The Book is therefore a double code. Taking the above example, you would turn up the word "Exchange," and find "in exchange for." The selected phrase could then be attached to almost any commercial word, such as "receipt," "documents," "cash," or anything else, in one word.

A further important feature of the Code is the Supplement, containing upwards of 2,000 blank lines (with code words), in which users can insert special sentences or lists of words, persons, steamers, goods, &c. Particular attention is directed to this facility, as such sentences or words once written in the Supplement automatically become part of the whole Code, and can be joined on as half-words to everything else in the Book. Example:—If "Peter Robinson" is inserted in the Supplement you could express in one word "Request Peter Robinson," "Consult Peter Robinson," or couple on to the name any of about 30,000 words and phrases. You could also reverse it, and say "Peter Robinson requests," i.e., any addition in the Supplement can be put before or after any phrase in the Code and be united in one word. If steamers' names, or lists of goods or ports, are inserted in the Supplement, any two can be coupled together in one word. Where there are ranges of ports, or ranges of goods, &c., as half-cyphers, any two of such ranges, can be coupled in one word. You could, therefore, give a rate and port in one word, the price or quantity of any goods (including the name) in one word, &c., &c.

A further facility will be found under the word "Article." Merchants can have a numbered list of articles and refer to them by the Phrase Code, provided they do not exceed four thousand; for example, under "Numerals" will be found "381," which can be suffixed to the word "Article No." Again by using the same cypher, but joining it on to "Article No. 1,000 and," the phrase would read "Article No. 1,381."

As regards the general construction of the Code it is alphabetically arranged throughout, but such phrases as "We shall have," "We shall not be," will be found under "We" (*i.e.*, under the first word), "If we shall" is placed under "If." All other phrases, such as "If required," are under the subject, in this instance under "Required."

The Code will be found exceedingly complete in ringing changes between the pronouns and auxiliary verbs. Under "Telegraph" will be found a large number of useful sentences, such as "Telegraph if you can." Figures and Fractions are under "Numerals;" £ s. d. will be found under "Sterling." The foreign currencies are very complete, namely, the extensive range of figures under "Numerals" can be coupled on to Roubles, Francs, Dollars, etc., etc., and be telegraphed as one word. Under many subjects, such as Francs, will be found sentences, thus, "(—) Francs and 25 cents," so that you could say 391 francs and 25 cents, or, \$681.25 in one word.

Purchasers or intending purchasers should take the most difficult and unusual message they have had to transmit (one incapable of being coded to any extent by other existing Codes) and it will be found that this Code can transmit it verbatim, with a minimum saving of 50 per cent. Some businesses necessarily require technical additions, but these can be inserted in the Supplement, also any sentences solely applicable to the particular trade.

Resolutions of Boards and questions of policy can be transmitted in precise phraseology.

In most instances the Phrase Code can be mixed with other Codes, particularly those containing dictionary words, which very largely differ from the artificial words used in this Code. This, however, requires care; but messages compiled from this Code (even if other Codes were in general use) would be at once detected. To prevent any confusion the first half of the first cypher could be "coloc," meaning "Bentley's Complete Phrase Code."

As regards the cyphers, every care has been exercised to comply with the following rules of the last Telegraphic Convention, which came into force on the 1st July, 1904:—

"Code language is composed (a) of real words not forming comprehensible phrases, and (b) of combinations of letters having the appearance of real words."

"(b) The combinations of letters (which must also be within the limit of ten letters) must be pronounceable according to the usage of one of the above-mentioned languages." (Note—the languages referred to are English, French, German, Dutch, Italian, Spanish, Portuguese or Latin.)

"Combinations formed by the running together of *bona fide* words are prohibited." (Note—This refers to such single words as "wearenot.")

Purchasers of this Code should particularly note that the half-cyphers can be used alone, or any two can be joined together, before or after one another, as each half-word is pronounceable by itself, and, therefore, any two are pronounceable when combined.

The completeness of the Code, as contrasted with all other Codes, is obvious, for whereas a huge Code under the ordinary system would only contain 200,000 sentences, this Code contains hundreds of millions of sentences in a small compass. Its cost is covered very rapidly by reason of the great economy it effects.

The Author will be pleased to advise Merchants and others as to the improvement of their Telegraph Codes.

An examination of the many Examples (immediately following this) will justify the title given to the Code.

E. L. B.

October, 1906.

SPECIMEN MESSAGES.

BENTLEY'S TELEGRAPH CYPHERS.

Title of Edition.	Giving Ranges.	No. of Letters in Each Word.	Price per Copy.	Special Feature.	Remarks.
1 MILLION	<u>000000</u> 999999	8	10/6	Can be used with Bentley's Complete Phrase Code.	Enables users of Bentley's Complete Phrase Code of 990 Million Phrase Combinations to indiscriminately mix therewith any Numbered Sentences from A.B.C., Western Union, Lieber, or private codes, and at once identify them.
100 MILLION	<u>00000000</u> 99999999	10	£1 10/-	Commence with Vowels in 1st and 2nd $\frac{1}{2}$ of each word.	Any 2 of 9999 Numbered Sentences or Numerals can be joined together in 1 word.
200 MILLION	<u>000000000</u> 199999999 or 999919999	10	£3 10/-	Commence with Consonants in 1st $\frac{1}{2}$ of word and Vowels in 2nd $\frac{1}{2}$, or <i>vice versa</i> .	Specially useful as additional Cyphers for Merchants whose Figure Codes require a series of "9"s. Each of Bentley's 400,000,000 Cyphers differs (in the complete word) by at least 2 letters from Whitelaw's Collection and is identifiable.
300 MILLION	<u>000000000</u> 299999999 or 999929999	10	£4 10/-	Commence with Vowels in 2nd $\frac{1}{2}$ of word, or <i>vice versa</i> .	
400 MILLION	<u>0000000000</u> 1999919999	10	£2 10/-	Each $\frac{1}{2}$ word commences with a Consonant.	Any 2 of 20,000 Figures or Sentences can be sent in 1 word.
900 MILLION	<u>00000000000</u> 2999929999	10	£4 4/-	In alphabetical order throughout.	Any 2 of 80,000 Sentences in Moreing and Neal's Mining Code or any 2 groups of 80,000 Figures or Sentences can be sent in 1 word.

SUPPLEMENTARY DISTINGUISHABLE CYPHERS

PRICES: { TWO-VOWEL PREFIXES, (in addition to Prices of 1 to 900 MILLION SERIES quoted above) - - **10/6**
 TWO-VOWEL SUFFIXES, " " " " " " " " " " - - **7/-**
 FIVE-LETTER ENGLISH WORDS " " " " " " " " " " - - **5/6**

Title of Series.	Character of Cyphers.	Number.	Special Use.	RANGES IF JOINED TO				
				Million Series.	100 Million Series.	400 Million Series.	900 Million Series.	English Cyphers
English Cyphers	5 letter English uncommercial words	800	To identify succeeding figures to be mixed with Bentley's Phrase Code (without special indicator.)	299999 (Special Suffixes.)	2999999	29919999	29929999	—
2 Vowel Prefixes	5 letters, each commencing with 2 vowels & ending with "i" or "u"	600	Ditto.	—	—	59919999	—	—
2 Vowel Suffixes	4 letters ending in 2 Vowels	100	Ditto.	99999	999999	1999999	2999999	29999

These Supplementary Distinguishable Cyphers are of great importance to users of Bentley's Complete Phrase Code because that Code expresses almost any telegram verbatim (with a minimum saving of 50 per cent.), and the Distinguishable Cyphers enable Figure Codes to be mixed (without Special Indicator) in the same telegram. The presence of such Figure Codes is detected before translation.

If 99 of the "Z" Cyphers at the end of Bentley's Complete Phrase Code are appropriated to figures 00 to 99 they can form the first two figures of groups for Figure Codes or Tables, and thus give a range of 99299999 or 99199999 or 99999999 according to the series to which they are attached, but under "Figure Codes" and "Tables" in the Phrase Code additional facilities are given.

The first $\frac{1}{2}$ -Cypher taken from that book refers to the Figure Code or Table, and the Second $\frac{1}{2}$ -Cypher can give a range of 29999 variations for each Code. In the same way a message could start with say "999" taken from "Numerals," and could be added to "9999" taken from the "100 Million Cyphers," thus giving a range of 9999999.

BENTLEY'S TELEGRAPH CYPHERS

(Large Edition)

ARRANGED IN

TERMINATIONAL ORDER.

If one of "Bentley's Telegraph Cyphers" (of 10 letters) be mutilated in one half of the word, compare that portion of 5 letters with this Terminational Order, in which the complete edition of nearly 1,000 million cyphers will be found arranged backwards (alphabetically). The following example (see page 1, first word of column 2), illustrates its use:—If the code word "marba" were received "parba" you would turn up "ba" (in dark type) and working backwards would show that there is a cypher "marba" but not "parba."

Taking a more intricate case. Suppose a telegram arrives containing the word "Babanubcaf" (mutilated in two places); neither "Baban" nor "Ubcaf" will be found among the cyphers.

In the Initial Order we find ... "Babad"

And in the Terminational Order ... "Faban"

Likewise we find in the Initial Order ... "Ubcab"

And in the Terminational Order ... "Abcaf"

These would give the following four combinations:—

Babadubcaf = N instead of D, and F instead of Z

Fabanubcaf = B instead of F, and F instead of Z

Fabanabcaf = B instead of F, and U instead of A

Babadabcaf = NU instead of DA (in centre of word)

*These transpositions together
are not possible telegraphically.
(See Table).*

If, therefore, the translation reads correctly, this word can be safely adopted, pending repetition, as, according to the Morse Signals, such substitution is possible by an error in spacing.

One of Bentley's Cyphers (of 10 letters) can, therefore, be examined in four different ways, namely, from the first letter (commencing the first half of the Cypher) to the fifth letter, from the fifth back to the first; from the sixth letter (commencing the second half of the Cypher) to the tenth letter, and from the tenth back to the sixth. These Terminational Orders have been found invaluable, and frequently avoid the delay of repeating messages. To further assist the discovery of telegraphic mutilations a list of "Possible Transformations of Telegraphic Signals" is given at the beginning of the Terminational Order.

E. L. BENTLEY.

POSSIBLE TRANSFORMATIONS OF TELEGRAPHIC SIGNALS.

LETTER.	MORSE SIGNAL.	POSSIBLE SUBSTITUTIONS.	LETTER.	RECORDER SIGNAL.	POSSIBLE SUBSTITUTIONS.

BENTLEY'S MILLION CYPHERS.

(8 Letters each with a 2 Letter difference.)

FOR TRANSMITTING ANY FIGURES WITHIN THE FOLLOWING RANGE:

0/9, 00/99, 000/999, 0000/9999, 00000/99999, 000000/999999.

These Cyphers ("First Series") are compiled, with Terminational Order, for use with "Bentley's Complete Phrase Code" and "Bentley's 900 Million Cyphers," from all of which they can be immediately distinguished, as they are shorter in length by two letters in the complete word.

Many firms use Codes having *numbered sentences*, or in some instances, both code words and numbers against each sentence. Bentley's Million Cyphers are specially adapted for indiscriminately mixing such Private Codes (or the chief Public Codes, viz.: A.B.C., Western Union, Lieber's and others) with "Bentley's Complete Phrase Code" of about 1000 million phrases and combinations. The numbers standing against the sentences in such Codes are converted into these Cyphers *instead of using the Code words in those Codes*, thus preventing any possibility of confusion arising when mixing such sentences with "Bentley's Complete Phrase Code." These facilities ensure a great economy in despatches. The Cyphers also are specially useful for transmitting messages under the Figure Code System, enabling users to state in one word the quantity up to 999 of any of 1000 articles, or to combine any three of 99 sentences or two of 999.

EXAMPLES.

(Divide the word in half and translate each half.)

abwe | aciv
3 | 6

aeve | atec
8 | 75

afot | axmo
07 | 93

awac | kaoz
83 | 437

azad | bivo
003 | 022

On page 8 will be found another set of Cyphers ("Second Series") from "Bentley's Complete Phrase Code," which enables a half cypher to be used from that Code, and the other half of the same word can represent the first one, two or three figures of the number of a sentence, not exceeding 210,000, taken from a Private or Public Code.

EXAMPLE.

One Word (anvdzwoes).		One Word (zygdoepjyt).	
anvdo	zwocs	zygdo	epjyt
	020	085	
Sentence from the "Phrase Code."	Being the first 3 figures of a group from the Private or Public Code transmitted by the 2nd series, page 8.	Being the last 3 figures a group from the Private or Public Code.	Another sentence from the "Phrase Code."
= Sentence No. 020085 in Private or Public Code.			

This latter enables the user to unite in two words one phrase from "Bentley's Complete Phrase Code," one phrase from the Private or Public Code, and another phrase from "Bentley's Complete Phrase Code."

The two series must be kept distinct, i.e., a half cypher from the 1st series *must not* be joined to a half cypher from the 2nd series or Phrase Code.

Apart from the above facilities any two words or phrases from "Bentley's Complete Phrase Code" can be coupled together in one word of ten letters as contrasted with eight letters in this Million Series.

1ST SERIES.

These Cyphers are to be used for

INSTRUCTIONS.

If a mutilated Cypher should arrive reading "etabmele," divide the word into "etab" and "mele," and by turning to this Terminational Order and working backwards through "etab" you find (top of third column) that the code contains "atab" and similarly (top of fifth column) "nele." These would give the correct Cypher, viz., "atabnele."

2ND SERIES.

Divide the figures thus:
0/841, 01/789, or 179/030.
viz., always 3 figures in the latter
part.

N.B.—If these Cyphers are used
for this purpose they must
be cancelled in "Bentley's
Complete Phrase Code"
supplement.

This page must be used to transmit the first part (0,00 or 000 to 210) of the number of any sentence
in the Code, and thus show
that a sentence is inserted in the message from that Code, for which purpose these cyphers
are exclusively reserved. Any of these can be used for the second part of the number
(000/999), the figures in excess of 210 being found under "Numerals" in the Phrase Code,
pages 122/5.
